

## Bio-Geographies

I'm interested in developing postgraduate projects that bring geographical and biographical research inquiry into closer correspondence. Such 'bio-geographies' are concerned with finding ways to creatively narrate and re-place life stories; these might be the biographies of recognised geographers, or of lesser known people with a peculiar passion for place. For example, I'm currently co-supervising a postgraduate research project which fuses the biography of a short-lived geography journal, its various academic contributors, and the autobiography of the student doing the research.
